

Jeweled Ruby Construction

We want to make this shell.

Lay out the positions of the silver stars in the outer petal.

Glue the silver stars in those positions.

Fill the rest of the outer-petal hemis with red stars, and the inner-petal hemis with silver stars.

Line outer-petal stars with tissue paper and burst.

Remove the X jig.

Expose the depression-forming hemi.

Remove the depression-forming hemi.

Insert star-filled inner-petal perforated hemi.

Line inner-petal stars with tissue paper, and fill with burst.

Fold layers of tissue paper inward, and Mash-Flat.

Filled hemi ready to be capped.

Capped hemisphere, ready to be mated with other one.
