

The Mystery of SGRS

Raw Material

“Cooked Glue” On Silicone Sheet.

(Why not just use the wet “glue” if you are making stars or “Toro”)

“Cooked till Crispy”

Convection oven 325 F

Still Goopy in center!

First of several granulating
and redrying steps.

“Coarse Powder” Processed in high powder food processor.
Before final drying step.

“SRGS” Very sticky with wet finger test.
